Summary

Product-minded data and AI strategist focused on governance-first systems. Designs policy-to-runtime controls, operational evaluations, and auditable workflows that align AI safety with product velocity across regulated domains (AML/KYC, fraud, risk).

Core Skills

- AI governance & model risk management; privacy & safety guardrails
- Data platforms & architecture (Azure, Databricks, Snowflake, SAP)
- Product leadership (discovery→delivery, OKRs, stakeholder alignment)
- Operational evals, lineage, observability, auditability

Experience (selected)

VP / Director — Data & Analytics

- Led cross-functional programs spanning data platforms, ML pipelines, and BI; improved decision velocity and reduced risk exposure.
- Implemented governance for model lifecycle (registries, lineage, approvals) aligned to SOC2/ISO27001 controls.
- Partnered with business to translate strategy into OKRs; delivered measurable outcomes in cost, risk, and revenue enablement.

AI Governance & Risk Lead

- Operationalized privacy/safety guardrails, red-teaming, and evals across CI/CD to prevent PII leakage and unsafe outputs.
- Introduced policy-to-code pipelines with audit trails and explainability artifacts consumable by Risk & Compliance.
- Drove model monitoring, incident playbooks, and post-incident review processes with continuous improvements.

Product Leader — Data/AI

- Owned discovery→delivery for AI features; balanced experimentation with compliance to accelerate time-to-value.
- Shipped RAG and automation workflows with clear service levels for latency, cost, accuracy, and safety budgets.
- Mentored squads on product thinking, hypothesis-driven roadmaps, and stakeholder communication.

Ventures

- Sandscript AI LLC — governance-first AI & regtech builds (ScamShield DXB, DetectScam.ai, AMLCheck.ai).

- Other — Divya (AI consumer branding), Forex Platform for Thomas Cook, Automation platform, AstroDeeya.com.
